

Fillo™

Nothing brings a good night sleep to the backcountry like a great pillow. The NEMO Fillo™ uses thoughtful design to put all the comfort of a full size pillow in a 10.9 ounce package that stuffs smaller than a 1 liter water bottle. Most camping pillows are either inflatable and too firm and unstable, or filled with stuffing and too small and squishy to offer good neck support. Fillo™ uses a combination of a 3" thick inflatable cell with engineered baffles and 1" of quality memory foam to provide adjustable height, stability and the kind of sink-into-the-pillow comfort you can fall asleep with. Elastic cord under Fillo™ lets you attach an extra piece of clothing for additional height to accommodate side-sleepers with broad shoulders. The Fillo™ cover is made of a velvety-soft washable microfiber fabric and the stuff sack is integrated for your convenience.
