

NEMO MISSION

Our 2010 product line is the result of 8 years of devoted labor and half a million years or so of developing better tools for shelter and survival. NEMO is about what we have just discovered and what we have known for a long time. It's about beautiful design and intelligent engineering. It's about serene cloudless days and bitter cold nights spent battling snow drifts and frostbite. It's about bringing two worlds together: the world of design and technology and the actual world where we test ourselves and our inventions. We are pursuing perfection. It is an epic journey, often elusive, demanding youthful energy, creativity, and courage. We have come a long way in our travels and we promise never to yield in our determination. Like our ancestors who explored new places for the first time, we will change the common idea of what is possible.

NEMO's spirit is in adventure. Without the beautiful wild places where adventures are made, our spirit dies. We are committed to reducing our environmental impact. Finding the right path forward takes a great deal of research, problem solving and commitment. And finding the right path is only the first challenge, walking that path is the real test. NEMO has been making strides to use more sustainable materials, to repurpose byproducts of manufacturing, and to recycle products at the end of their useful life. We are taking steps for the future of our planet and hope you will do the same. To learn more about NEMO's GRN™ efforts, please visit our website.

| Floor Area: | 50 ft ² (4.6 m ²) |
| Vestibule Area: | 24 ft ² (2.2 m ²) |

LOSI STORM 3P™

3 PERSON

Optional Accessories

1. **Footprint:** The Footprint is a 70D abrasion-resistant nylon fabric ground sheet perfectly sized to fit underneath your tent. The fabric is PU coated for waterproofness (10,000 mm). The Footprint reduces wear and tear on your tent floor from contact with the ground.

2. **Pawprint™:** The Pawprint™ is a removable liner perfectly sized to fit inside your tent. It has the dual function of protecting your tent floor from boots and paws, and of adding serious comfort. The Pawprint™ is made of a machine-washable brushed polyester that is very soft to the touch. Place your sleeping pads between the Pawprint™ and floor to help them stay in place. With a clean, soft Pawprint™ under you, you might be able to save some weight and travel with a lighter sleeping bag or blanket.

3. **Gear Caddy:** A Gear Caddy with Light Pockets™ and multiple organizing compartments is included with every Losi 3P™ tent. A second optional Gear Caddy can be added for even more storage at the opposite end of the tent. The Light Pockets™ diffuse light from your headlamp to cast an even glow over the whole tent.

4. **Gear Loft:** The Losi 3P™ Gear Loft adds additional overhead storage without compromising floor space or elbow room. The mesh Gear Loft is perfect for drying clothes or stashing gear for quick access. The Gear Loft also has two mesh gear storage pockets and two Light Pockets™ which diffuse light from your headlamp to cast an even glow throughout the tent interior.

LOSI STORM 3P™

Year-Round Luxury

Losi Storm 3P™ is the extended season version of NEMO's proven Losi 3P™ design. We have replaced strategic areas of mesh in the inner tent with a lightweight wind-resistant 20D nylon ripstop and extended the fly to meet the ground for full wind protection. The overall design continues the legacy of the Losi™ tents with a superior space to weight ratio and dual entry/ vestibules, but has been modified to handle even harsher conditions. The full coverage fly includes overhead vents and can be set up without the inner tent as a sunshade or tarp shelter. This is a tent you can count on to cover your back no matter the season. Includes GREEN™ anodized DAC Featherlite® NSL poles, Gear Caddy, roll-up style stuff sack, stakes, and repair kit. Optional Footprint, Pawprint™, Gear Loft, and additional Gear Caddy are available.

LOSI STORM 3P™ Innovations

1. **Superior Hardware:** Several innovative pieces of hardware are used to increase the ease of setup and strength of Losi Storm 3P™.

The DAC Jake's Foot corner anchor system makes tent setup faster and easier. The main poles attach to the anchors by ball and socket. When the fly is attached, the Jake's Feet act as cantilevers to pull the corners of the inner tent closer to the ground. The Jake's Feet also allow you to set up your fly and poles without the inner tent to create a convenient tarp/shade shelter.

The Intersection Hubs and center Swivel Hub lock the poles together at each location where they cross. This makes the tent much stronger and resistant to wind forces.

The unique shape of the DAC pole clips makes them easy to use and more durable than standard pole clips.

2. Unique Pole Configuration: The ridge poles on Losi Storm 3P™ run the long direction on the tent and terminate above the ground. This design adds significant interior volume and provides nearly vertical walls on all sides of the tent. The steep walls mean you can sit straight up almost anywhere inside Losi Storm 3P™.

3. Dual Vestibules/Entries: Two doors and two vestibules eliminate jostling for position and gear storage. For maximum ventilation on sunny days, tie back the doors or take off the fly. Leave the doors open for a slight breeze on cooler or wetter nights. When rain and snow are coming down hard, close the entire vestibule for full protection.

4. Wind Blocking Panels: Wind resistant and breathable 20D fabric is strategically used on several panels of the Losi Storm 3P™ inner canopy to fight off cold winds. Mesh above your head and feet promotes air circulation and discourages condensation from forming inside your tent.

5. Gear Caddy with Light Pockets™: The Gear Caddy is a detachable storage unit that can be installed on either end of the tent. It is made of mesh and has compartments of all different sizes to fit glasses, books, or clothes. The Gear Caddy also includes two Light Pockets™. This special pocket holds your headlamp and has a light diffusing fabric that helps cast an even glow throughout the tent.

6. Fly Vents: Dual vents at the top of Losi Storm 3P™ fly provide an outlet for heat and moisture on warm nights, and help promote air circulation. An additional mesh filter in the vents reduces infiltration of blowing rain and snow through the fly vents into the inner tent. On cold nights, the vents can be closed completely to keep heat inside.

NEMO Quality

There is a reason why our logo resembles a medieval shield. If you've ever seen an authentic medieval shield or piece of armor, the detail and quality of craftsmanship are astonishing. Hours were spent shaping and perfecting every component knowing the gravity of purpose and the need for reliable performance. At NEMO, we take the same approach to quality. We know from our own experience how vital a tent can be for comfort and survival. Your tent is your home in the wilderness and your armor against the elements. We obsess over every design decision to ensure you get the greatest comfort and protection possible. Our process begins with pencil and paper and evolves methodically through computer modeling, prototyping, testing, and development. We use all the latest tools, software, manufacturing methods, and materials. If we aren't happy with what's available, we make our own. We strive to design and build the best tents on the planet. We stand behind our shield, the symbol of NEMO quality.

NEMO Warranty

NEMO guarantees every product we sell. We put great effort into choosing the best materials and providing you with the highest level of workmanship. We proudly stand behind everything we make. NEMO products carry a lifetime warranty against defects in workmanship and materials to original owner, with proof of purchase. Warranted products will be replaced or repaired at NEMO's discretion. NEMO does not warranty products against normal wear and tear, unauthorized modifications or alterations, improper use, improper maintenance, misuse or neglect or if the product is used for a purpose for which it is not intended. Except as expressly set forth in these terms and conditions, NEMO is not liable for any direct, indirect or consequential damages arising out of or resulting from the use of a NEMO product. The warranties set forth in these terms and conditions are in lieu of all other warranties, express or implied, including without limitation, implied warranties of merchantability or fitness for a particular purpose.

If you are having a problem with your NEMO product, please visit www.nemoequipment.com/tent-manufacturer-warranty or call NEMO Customer Service at 1-800-997-9301.

We will do our best to see that you are satisfied with your NEMO product. Our goal is to get you back in the outdoors as quickly as we can.

**WARNING**

Never place your stove, campfire, or other flame source in or near your tent. Never cook, light, or refuel a stove or any other heat source inside your tent. Death by suffocation and/or serious burns is possible.

Maintain adequate ventilation inside your tent at all times. Death by suffocation is possible.

Anchor your tent properly at all times to reduce the risk of loss or injury to the tent or occupants.

Carefully consider the possibility of falling rocks or tree limbs, lightning strikes, flash floods, avalanches, strong winds, and other hazards when choosing a campsite to reduce the risk of loss or injury.

If you have additional questions, please contact NEMO Equipment, Inc. directly at 800-997-9301.

NOTE: All 2010 NEMO tents meet the CPAI-84 standard for flame retardancy.

INSTRUCTIONS FOR SETUP

To contact NEMO Customer Service
Email: journey@nemoequipment.com
Phone: 800-997-9301

1 Stake Corners (optional)

Secure the corner anchors by pounding the stakes into the ground with a rock or hard object. If the ground is too hard, trap the stakes under a rock or another heavy object.

2 Jake's Feet and Center Swivel

Press the ball ends of poles into the fittings (Jake's Feet) at the corners of the inner tent. Attach the black clip at the center of the mesh to the clear swivel between the main poles.

3 Clips and Pole Sleeves

Attach the inner tent to the main poles with clear clips. Slide the ridge poles through the side pole sleeves keeping the ridge poles on the outside of the main poles.

4 Secure Ridge Poles

Snap ends of ridge pole in ball caps on sides of tent. Align plastic rings on ridge pole above the intersection hub and press down into place. Attach black clips on the mesh tent to the hub bottoms.

5 Attach Fly

Clip the corners of your tent fly to the Jake's Feet. Proper tension ensures maximum water shedding and wind resistance. Pull firmly on the adjustable corner anchors.

©2010 NEMO Equipment, Inc.

Remember to leave no trace. Before leaving your campsite take a thorough look around making sure you have not left anything behind, out of place, or damaged.
