USE

Installation

It is easiest to install the Cheez™ before the inner poles are in position. Lay the Cheez™ on top of the poles, and connect the snaps on the corners to the upper snap in the corners of the tent. Place the pole ends in the large button snaps like the usual setup.

Connection

With the Cheez™ sandwiched between the poles and tent, pull the Velcro tabs on the inside of Moki™ through the slits of the Cheez™ and connect them to the inside. Connect the Velcro along the sides at floor level.

With the Pawprint™

When using the Pawprint™ in conjunction with the Cheez™ insulation, remember to connect the sides of the Pawprint™ to the lower piece of Velcro hooks. The Cheez™ insulation will attach to the upper piece of Velcro hooks.
